

Recommendation for Re-challenge to International Accounting

Akiko Fujita

Meiji Gakuin University

Japanese Association for International Accounting Studies (JAIAS) has been established in 1984. Since then, the association has promoted international accounting research by way of organizing international conferences and publishing research reports every year. In this pro-

posal, we will investigate (enquire) the activities of the research organizations related to the accounting studies in other countries. By so doing, we will pursue further possibilities of JAIAS's activities.
